

# Sync a Google Chrome profile

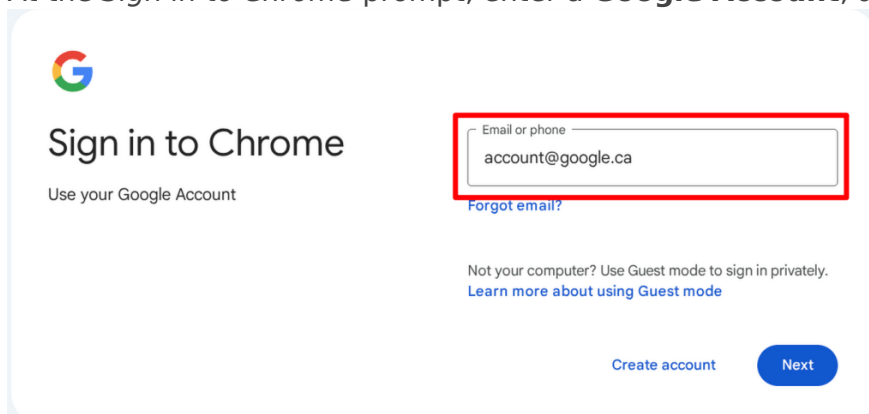

Ensure *Google Chrome* is open.

Select the **Profile** icon from the top left, then select **Turn on sync...**

An account may already be associated with a *Chrome* profile. If so, take note of the account used, and ensure it is actively syncing with Google's services.

At the *Sign in to Chrome* prompt, enter a **Google Account**, and select **Next**.

After successful login, the *Enterprise Management* dialogue will appear. **Check the box** for *Add existing browsing data to managed profile*, then select **Continue**.

### Your organization will manage this profile

This account [REDACTED] is managed by [REDACTED]

You're adding a managed profile to this browser. Your administrator has control over the profile and can access its data. Bookmarks, history, passwords, and other settings can be synced to your account and managed by your administrator.

Add existing browsing data to managed profile <sup>1</sup>

Cancel

Continue <sup>2</sup>

From the *Turn on sync* dialogue, select **Yes, I'm in** from the bottom right.

### Turn on sync

Back up your stuff and use it on any device

- ☆ Bookmarks
- 📄 Autofill
- 🧩 Extensions
- 📅 History and more

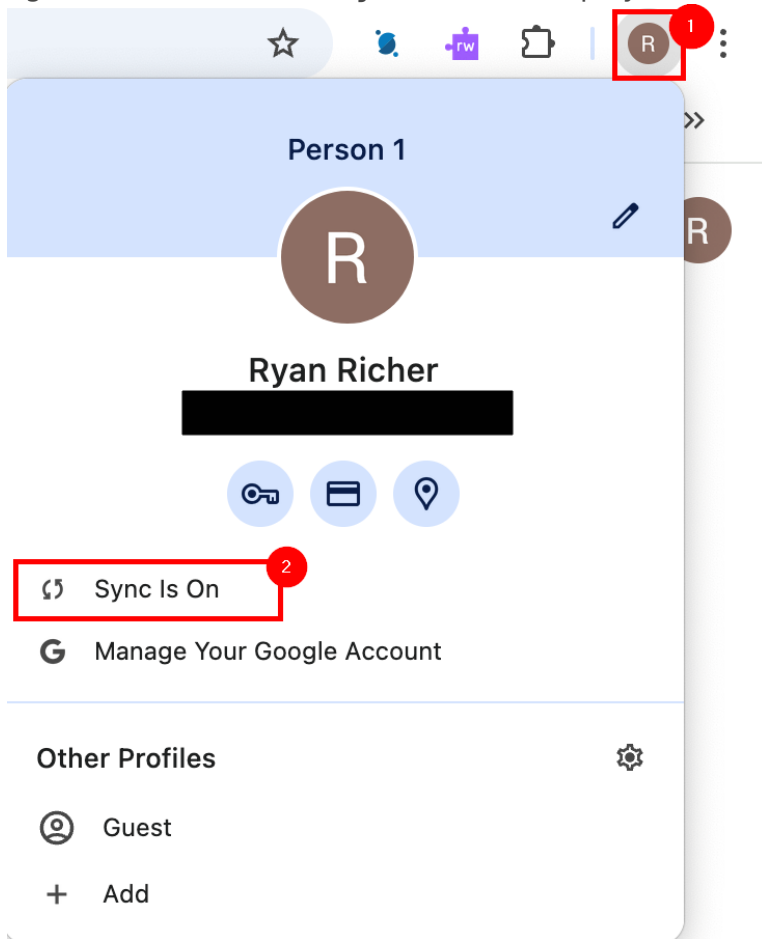

You can always choose what to sync in settings. Google may personalize Search and other services based on your history.

Settings

Cancel

Yes, I'm In

When complete, verify success by selecting the **Profile** button from the top right of *Chrome* once again, and ensure that **Sync in on** is displayed.
