

MacBook User Guide

- [Export from the Photos App](#)
- [Export Passwords & Bookmarks from Safari](#)
- [Self-Migration Checklist](#)

Export from the Photos App

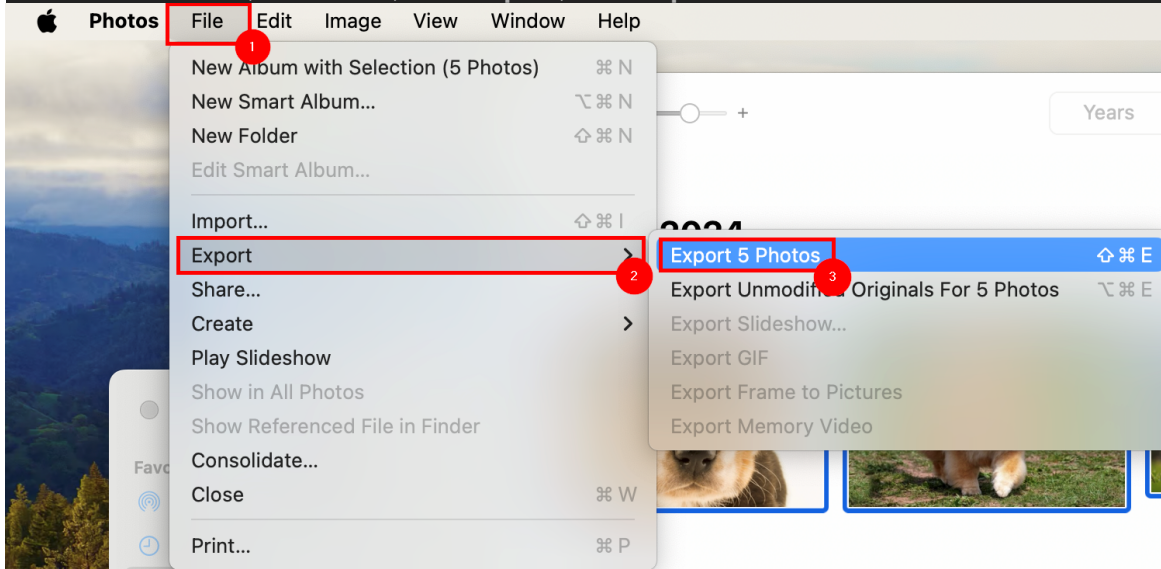

Ensure the *Photos* app is open.

In the *Photos* app, select **Library** from the left pane, then the **All Photos** tab from the top.

Press **Command+A** to select all photos.

From the *Menu Bar*, select **File**, then **Export**, then **Export X Photos**.

In the *Confirmation Window*, leave the defaults as shown, and select **Export**.

Photos

Photo Kind:

Info

Include: Title, Keywords, and Caption
 Location Information

File Naming

File Name:

Subfolder Format:

A *Finder* window will open.

Select **Documents** from the left menu pane, then **New Folder** from the bottom left.

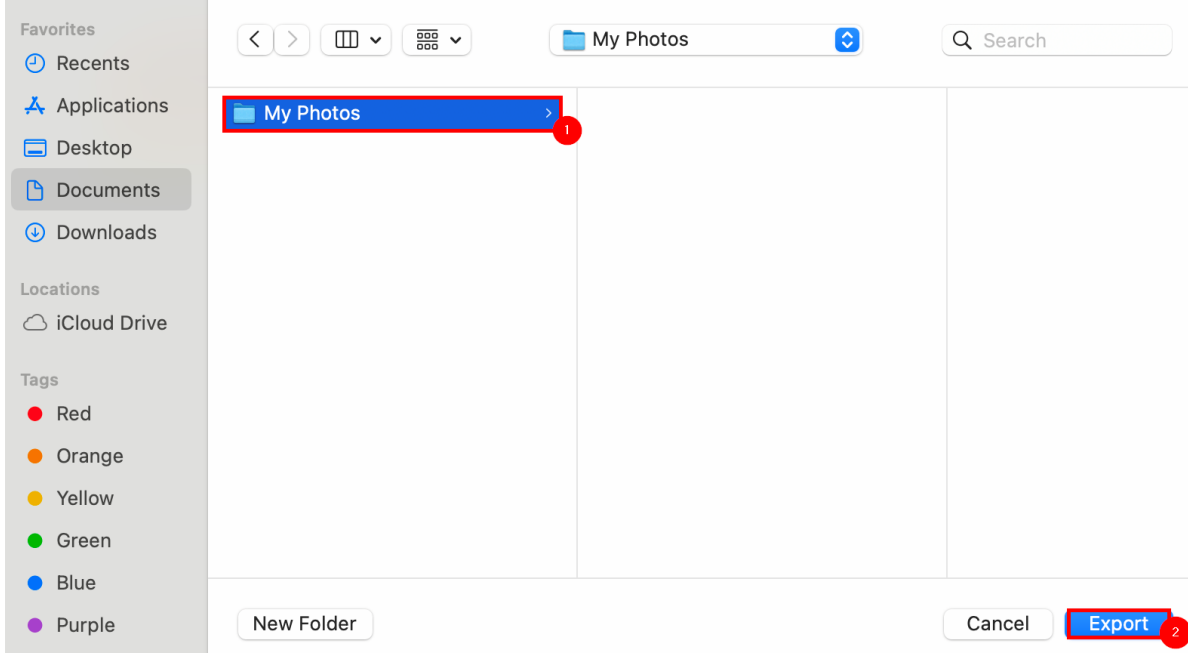

Finder window showing the **Documents** folder selected in the left sidebar (marked with a red circle 1). The **New Folder** button is highlighted at the bottom left (marked with a red circle 2). The **Export** button is also visible at the bottom right.

In the *New Folder* dialogue, enter **My Photos** as the folder name, and select **Create**.

New Folder

Name of new folder inside "Documents":

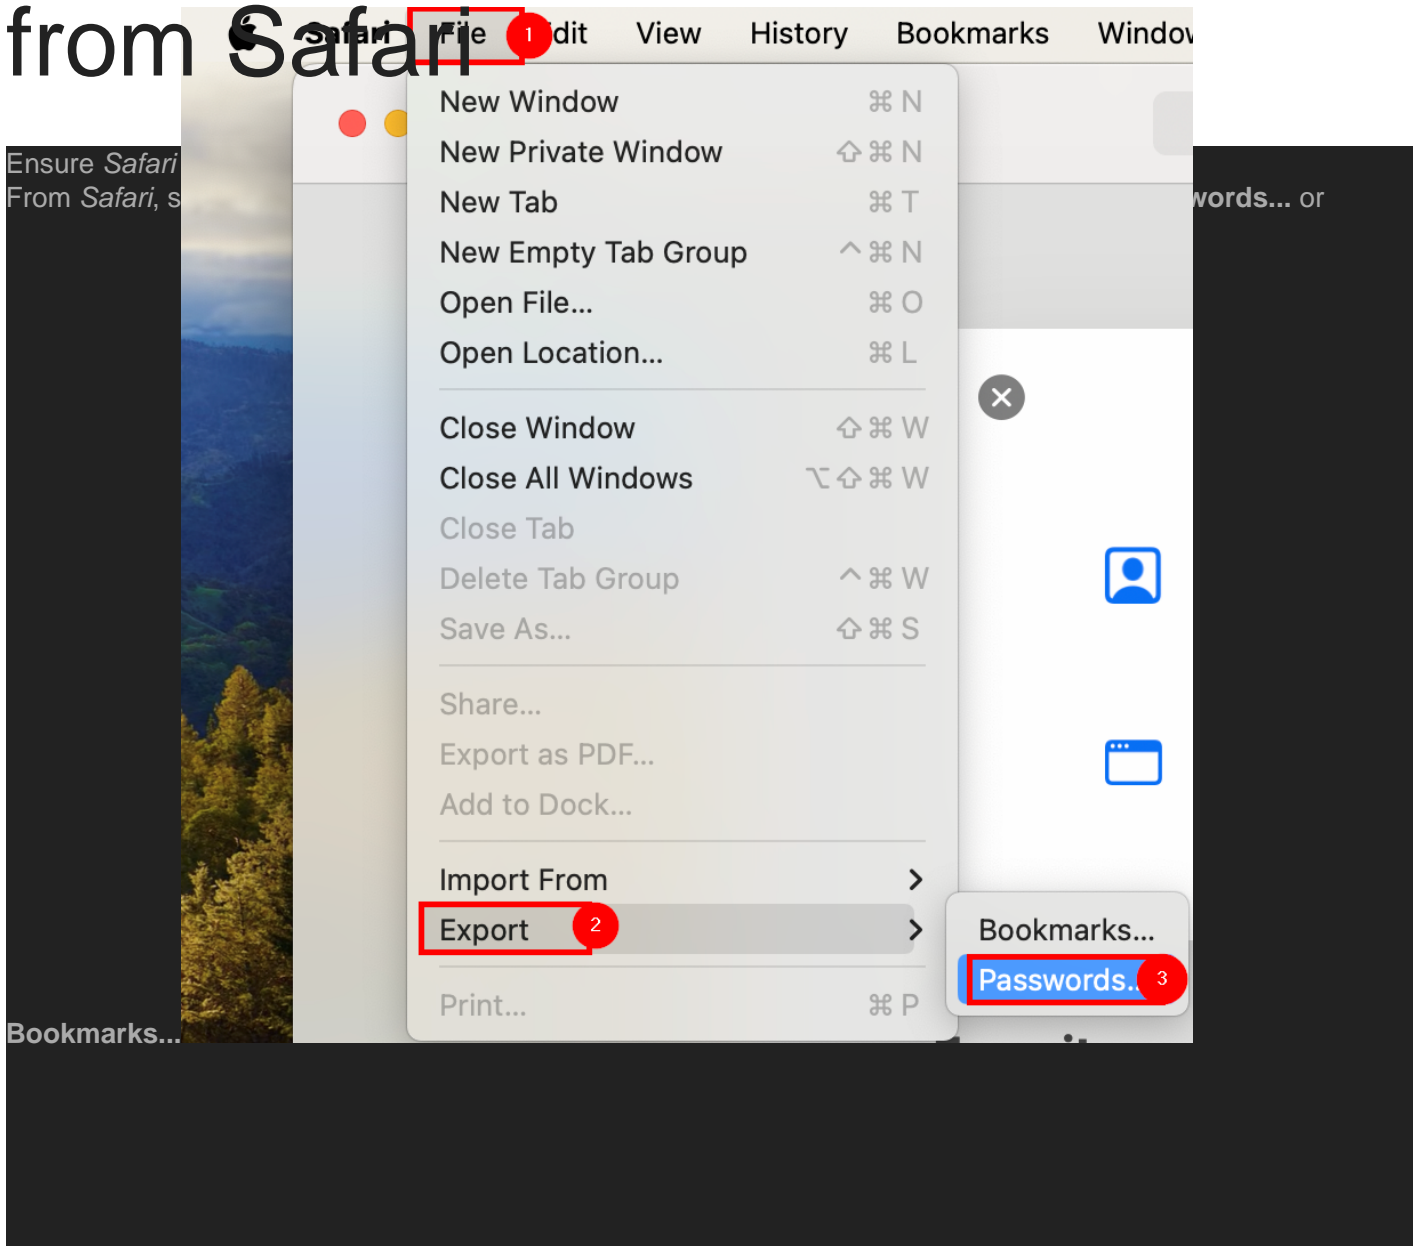

Select the newly made **My Photos** folder within *Finder*, and select **Export** from the bottom right.

The MacBook will take some time to process the export of all photos.

When complete, view the newly made **My Photos** folder to verify the export's success.

Export Passwords & Bookmarks from Safari

From the confirmation dialogue, select **Export Passwords...** or **Export Bookmarks...**

Are you sure you want to export your saved passwords?

Your passwords will be saved without encryption and will be visible to anyone who can access the exported file.

Export Passwords...

Cancel

From the *Export Passwords* or *Export Bookmarks* window, in the *Save As* field enter **Safari Passwords** or **Safari Bookmarks**. In the *Where* field, select **Documents**. Select **Save** when complete.

Export Passwords

Save As: Safari Passwords ¹

Tags:

Where: Documents ²

Cancel

Save ³

A dialogue window will open requesting your sign-on password. Enter it, and select **OK**.

Safari

Safari is trying to export passwords from your Keychain.

Enter the password for the user "Ryan Richer" to allow this.

Password

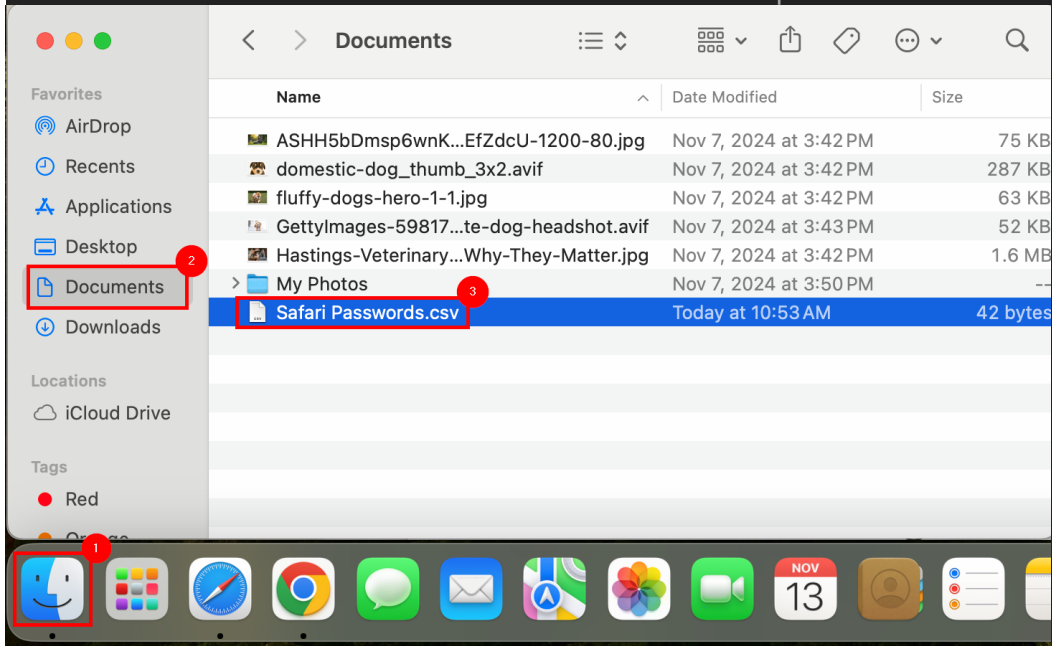

Cancel

OK

Safari will export all saved passwords.

To confirm successful export, open **Finder**, and select **Documents** from the left menu pane.

Safari Passwords.csv or **Safari Bookmarks.html** should be present in the list of files.

The Safari Password export is unprotected, and the passwords within are all in plaintext. Once the passwords are re-imported, or referenced, the Safari Password file should be deleted, and the trash emptied.

Self-Migration Checklist

- Export all photos and videos from the [Photos](#) app, and any content from **iMovie**
- [Sync Google Chrome](#) profile information, or [export Safari passwords & bookmarks](#)
- Optional:** Manually [backup files to OneDrive on the web](#), if the OneDrive application is not operating correctly
- Ensure [OneDrive is syncing](#), and files from *Downloads* are moved to the *Desktop*, *Documents*, or *OneDrive* folders
