Halld

Atmosphere: Airless or thin atmosphere
Temperature: Cold
Biosphere: Human-miscible
Population: Several million inhabitants
Tech Level: TL3
Description: Homeworld of the Bhelmir.

Geography

Halld is a frozen ball of ice and rock. Vast dunes of snow cover the majority of the planet along with oceans of shifting ice.

Fauna & Flora

No creatures live on the surface of the planet, however deep underground (nearer to the planet's core) there are systems of caves warmed by thermal vents that support a quite diverse group of life forms.
